MODEL PC33

September 2018

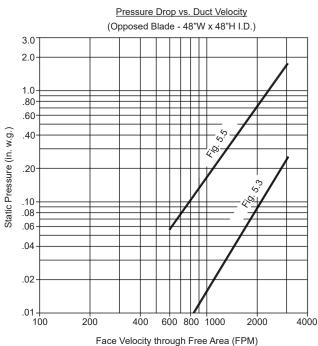

MODEL PC33

Page 2

Industrial Damper • Straight Blades • Formed Channel Frame • Galvanized Steel • 250°F Max Temperature

Pressure Drop Data

Pressure drop ratings are based on AMCA Standard 500, using test set-up figure 5.3 and 5.5. Static pressures are corrected to .075 lb./cu.ft. air density.

Air Leakage Data

Air leakage quantities shown in the chart are results of tests per AMCA Standard 500 and are shown at 1 in. w.g. differential pressure and are corrected to .075 lb./cu.ft. air density.
