Extruded Aluminum Damper • 5" Deep • 4" Airfoil Blade • Opposed or Parallel • Thermal Break • Insulated Frame

STANDARD CONSTRUCTION

FRAME: 5" deep x .081" thick (nominal) 6063-T52/T6 extruded aluminum,

.125" thick (nominal) frame also available. Frame is insulated

with 1/2" rigid foam insulation.

BLADES: 4" wide x .081" thick (nominal) 6063-T52/T6 extruded aluminum,

airfoil profile injected with a two-part polyurethane (CFC free)

foam, and debridged for thermal isolation.

AXLES: 1/2" dia. extruded aluminum, "Pin-Lock" design, interlocking into

blade section.

LINKAGE: Concealed in jamb of heavy aluminum. Crank arm permanently

locked to blade axle by two stainless steel fasteners. The crank arm contains a 1/2" dia. metal pivot riding in a celcon bearing. A 1/4-20 set screw with locking patch ties the 5/16" dia. aluminum linkage rod. The linkage of each damper is individually adjusted.

BEARINGS: "Double-sealed" type with celcon inner bearing riding inside a polycarbonate outer bearing positively locked into frame, designed

so that there shall be no metal-to-metal or metal-to-bearing riding

surfaces.

SEALS: Extreme low temperature seal system, extruded silicone rubber blade edge seal that fits into a ribbed groove insert in blades with

an extruded polycarbonate seal at jambs.

FINISH: Mill

TEMP. LIMITS: -40°F to +200°F

OPTIONS

Frame - Optional .125" thick (nominal) 6063-T52/T6 extruded aluminum

Hand Quadrants

120V, 24V Electric, or Pneumatic Actuators

Jackshafting

Auxiliary Switch

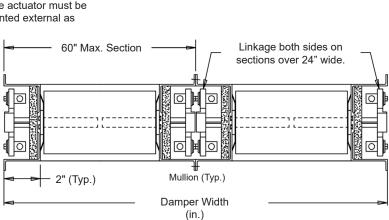

Explosion Proof Housing

NOTES

- 1. Nominal deductions will be made to the opening size given.
- 2. Dampers with multiple panels in both width and height may require structural support. It is recommended that large openings be designed with structural members so that dampers will span either width or height with a single panel. Structural support will not be provided with standard dampers.
- 3. Dampers more than one panel wide or high and operated with one actuator must be jackshafted. Factory supplied actuators are shipped loose to be mounted external as
- 4. Dampers at minimum panel size will have a single damper blade.
- 5. Not recommended for blades installed vertically.
- 6. Approximate shipping weight is 6.5 lbs./sq.ft.

DAMPER SIZES

Blade Type	Minimum Panel	Maximum Panel		
Parallel	6"W x 8%"H	60"W x 72"H		
Opposed	6"W x 8%"H	60"W x 72"H		

Not to scale.
