

Extruded Aluminum Damper • 5" Deep • 6" Airfoil Blade • Opposed or Parallel • Thermal Break • Insulated Frame

## STANDARD CONSTRUCTION

SIANDARD	CONSTRUCTION	
FRAME:	5" deep x .081" thick (nominal) 6063-T52/T6 extruded aluminum,	
	.125" thick (nominal) frame also available. Frame is insulated	-
	with 1/2" rigid foam insulation.	f
BLADES:	6" wide x .081" thick (nominal) 6063-T52/T6 extruded aluminum,	
	airfoil profile injected with a two-part polyurethane (CFC free)	
	foam, and debridged for thermal isolation.	
AXLES:	½" dia. extruded aluminum, "Pin-Lock" design, interlocking into	
	blade section.	
LINKAGE:	Concealed in jamb of heavy aluminum. Crank arm permanently	
	locked to blade axle by two stainless steel fasteners. The crank	
	arm contains a $\frac{1}{2}$ dia. metal pivot riding in a celcon bearing. A	
	$\frac{1}{4}$ -20 set screw with locking patch ties the $\frac{5}{16}$ dia. aluminum	
	linkage rod. The linkage of each damper is individually adjusted. "Double-sealed" type with celcon inner bearing riding inside a	
DEARINGS.	polycarbonate outer bearing positively locked into frame, designed	
	so that there shall be no metal-to-metal or metal-to-bearing riding	I
	surfaces.	
SEALS:	Extreme low temperature seal system, extruded silicone rubber	
	blade edge seal that fits into a ribbed groove insert in blades with	Damper
	an extruded polycarbonate seal at jambs.	(in
FINISH:	Mill	
TEMP. LIMITS:	-40°F to +200°F

Not to scale. Opposed Blade Model shown (Parallel Blade Model also Available)

will not be provided with standard dampers. 3. Dampers more than one panel wide or high and operated with one actuator must be jackshafted. Factory supplied actuators are shipped loose to be mounted external as standard.

so that dampers will span either width or height with a single panel. Structural support

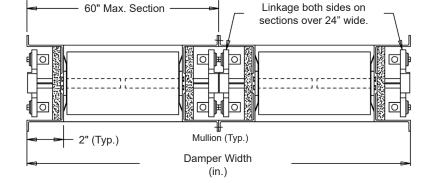

2. Dampers with multiple panels in both width and height may require structural support. It is recommended that large openings be designed with structural members

4. Dampers at minimum panel size will have a single damper blade.

1. Nominal deductions will be made to the opening size given.

- 5. Not recommended for blades installed vertically.
- 6. Approximate shipping weight is 6.5 lbs./sq.ft.

DAMPER SIZES									
Blade Type	Minimum Panel	Maximum Panel							
Parallel	6"W x 8%"H	60"W x 72"H							
Opposed	6"W x 8%"H	60"W x 72"H
