PERFORMANCE DATA

Test of a 48" x 48" sample by an AMCA Registered Laboratory according to AMCA Standard 500 shows low water penetration. Tests show less than .02 oz. per sq.ft. water penetration at 787 fpm (Free Area Velocity) with less than .11 in. w.g. pressure drop (intake) and .12 in. w.g. pressure drop (exhaust). Intake air is converted to standard air density.

An AMCA Registered Laboratory is a laboratory equipped and staffed to conduct tests according to the appropriate AMCA test method and which is licensed as an AMCA Registered Laboratory.

Ratings do not include effects of a screen.
