

To whom it may concern,

SUBJECT: Material Safety Data Sheets (MSDS)

As a purchaser of our products, you have requested or may require the information below to assist you in complying with the requirements of:

1. The Occupational Safety and Health Administration (OSHA) Hazard Communication Standard 29 CFR 1910.1200. These regulations are commonly referred to as the Employee's Right-To-Know.
2. Title III of the Superfund Amendments and Reauthorization Act (SARA) includes the Community's Right-To-Know 40 CFR 372. These regulations also require suppliers to provide MSDS's on certain items.

As required by the OSHA and SARA regulations, we maintain MSDS's on components and materials used in the production of our quality products. However, no MSDS's are necessary for the end products because they are exempt under the "article" definitions of the regulations. This means our end products do not release toxic chemicals under normal conditions of use.

End products, which consume fuel, may require an MSDS from your local fuel supplier, but do not otherwise, require an MSDS for the end product itself.

Any items that may be redistributed to you as special order materials and may require an MSDS (such as touch-up paint, special oil, etc.) will have the MSDS furnished by our original supplier attached to this letter.

Please let us know if you have any questions about the safe use of our products and their applicability to the Right-To-Know regulations.

Sincerely,

*Steve S. Anthony*
