MODEL	GPM	AVERAGE HOT WATER TEMPERATURE - BTU/HR./LIN. FT.						
		120°F	130°F	140°F	150°F	160°F	170°F	180°F
P9 3/4"	4	308	386	470	560	650	750	850
	1	292	366	445	530	620	710	800
P9 1"	4	297	373	454	540	630	730	820
	1	281	352	428	510	600	690	780

NOTES: All the ratings noted include a 15% addition for heating effect. These ratings are based on active length, which is total length less 4 1/2". Pressure drop for element with nominal 3/4" copper tube is 0.47 inches of water per linear foot at 1.0 GPM and .525 inches at 4.0 GPM. Pressure drop for element with nominal 1" copper tube is 0.13 inches of water per linear foot at 1.0 GPM and .145 inches at 4.0 GPM. The use of ratings at 4.0 GPM is limited to installations where the water flow rate through the baseboard unit is equal to or greater than 4.0 GPM. Where the water flow rate through the baseboard is not known, the rating of 1.0 GPM must be used.
